

Treston Tower storage and workstation unit

Being versatile and easily customisable for different environments and tasks, the Treston Tower storage and workstation unit is ideal for, for example, vehicle and machinery assembly lines, service and maintenance departments, and for any work that requires plenty of mobile storage and workspace near the product under work. Because the frame is equipped with the M750 upright frame module, almost all modular size M750 accessories are compatible with the Treston Tower storage and workstation unit.

- Up to 8 m² of versatile storage space and takes up less than 1 m² of floor space
- Ideal for facilities implementing LEAN and 5S philosophies because the open structure enables easy and quick visual review of the workstation
- Increases productivity and efficiency by saving time, since the tools and components are near the product under work and can be moved easily
- Enables proper ergonomics, since all tools and supplies can be placed at the correct height for the user
- Width 860 mm, depth 880 mm, height 1960/2105 mm (base/with castors)
- Max load 600/1000 kg (with castors/base)
