

SAPEL electrically height-adjustable trolley

Treston SAPEL is an electrically height-adjustable work trolley designed to move heavy, delicate or difficult-to-handle items easily, safely and ergonomically between workstations. SAPEL also serves as an additional work surface and an extension of the workspace. Thanks to matching dimensions with selected workstations such as QuatreX and Concept Ergo, SAPEL integrates perfectly alongside existing workstations. It can be adjusted to the desired ergonomic working height. It also enables smooth sliding of heavy items between the workstation and trolley, reducing manual lifting, reaching and unnecessary strain.

- Dimensions: 500 x 750 mm
- Electric height adjustment: 645–945 mm
- Four versions available:
 - 2-leg and 4-leg models
 - ESD-protected and standard versions
- Load capacity:
 - 4-leg version: 200 kg (incl. 150 kg on the top surface)
 - 2-leg version: 150 kg (incl. 120 kg on the top surface)
- Accessories: a handle, steel edges for the top surface, a lower shelf. The lower shelf accommodates a 600 × 400 mm Eurobox.
