

Castor and glide sets for chairs

Discover our Dual-wheel safety castors that are equipped with load-sensitive brakes that engage when the chair is unloaded. Our standard soft castors are suitable for hard CHCAS and CHCAS-ESD floors, while hard castors for soft floors are available upon separate order. Opt for our Stop&Go castors for effortless workplace mobility – these castors brake when loaded, ensuring a secure solution while allowing easy movement when the chair is unloaded.

Our abrasion-resistant plastic glides, designed for enhanced stability with a generous surface area. These glides can be easily added to all our chairs, providing a smooth and straightforward upgrade to your seating.
