

Treston NaturLite LED

Individually adjustable workstation lighting to illuminate the whole worktop. 4 models with high-quality, bright light. The dimming option guarantees that each workstation user gets exactly the amount of light that they need. Adequate lighting even for high-precision technical assembly work. The Plus 1200 model also has colour temperature adjustment, ranging from warm to cold white. Side lights enable eliminating all shadows from the work area, or creating shadows where they are needed.

- Four dimmable models to choose from
- The 1200 model for workbenches of 1500 mm or wider, colour temperature 4000 K
- The 900 model for narrow workstations, colour temperature 4000 K
- The Plus 1200 model has stepless colour temperature adjustment (2700 K – 6500 K)
- The Wing 500 model is suitable for use as a side light or even for placing in the middle of the workbench, colour temperature 4000 K
- Wattage of 14-60 W, illuminance of 800–3000 lux (lumen per square metre)
- LED life of 50,000 hours
- Achieving energy-efficiency with minimal maintenance measures
