

Uprights and profiles

Upright tubes are the basic element for accessorising our industrial furnishings. Accessories are attached to Concept, TED, TP and Workshop benches with the aid of upright tubes or a complete, upright tube module.
The complete upright tube module includes upright tubes, corner bracket pair and straight bracket pair (if module includes more than one horizontal tube). For the Concept bench, the upright tubes are attached to the rear case of the bench. With the TP bench, you also need an accessory frame TPK. For the TED bench, upright tube pair with a flange is fitted on worktop with screws.
