Your partner for
packaging and material
flow solutions

Increased efficiency in intralogistics

This is our aspiration. This is our promise. This is what Treston is all about.

- Modular concept
- Custom solutions
- Personal consultation
- Digital planning
- 3D drawings
- On-site test setups
- Assembly service

Challenges and trends in intralogistics

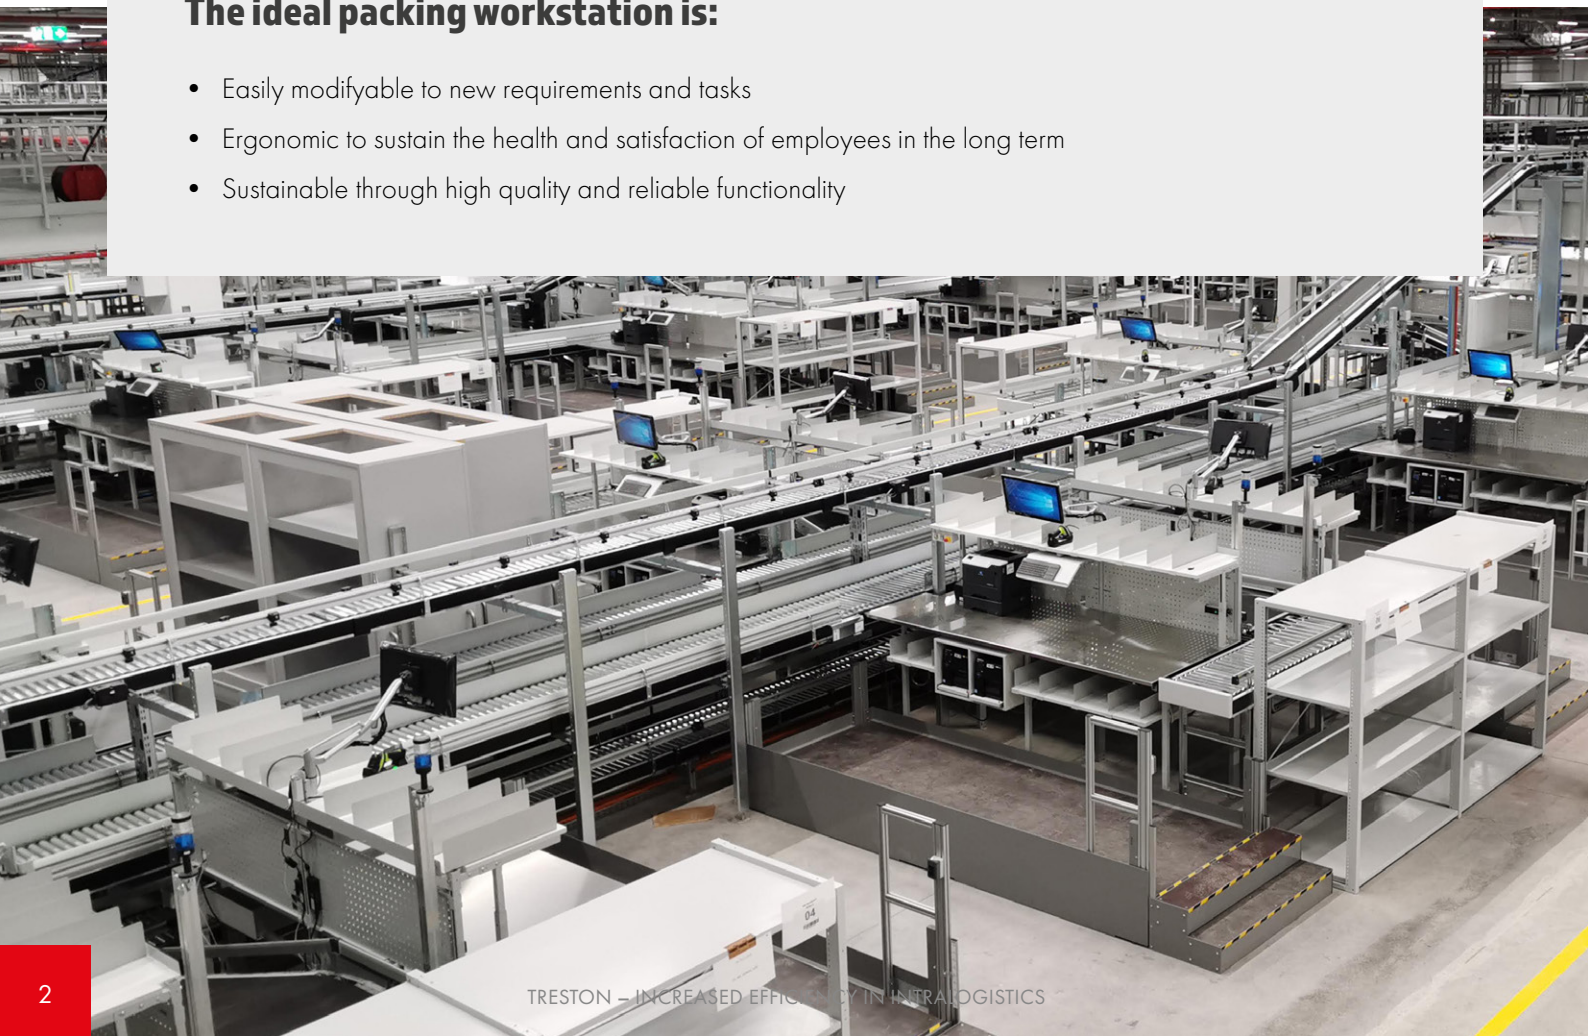

Fast delivery time is essential to survive in the market and remain competitive. Transport, storage, packaging, final assembly, and quality testing are often integrated to streamline processes and support getting to this goal.

Efficient collaboration among all parties involved is a major challenge in intralogistics processes. At the same time, returns and their processing costs are increasingly on the rise. Especially in the consumer goods sector, returns management and quality controls are gaining further importance.

These requirements can be met with well-organized material flows and smart, ergonomic, flexible workstations which easily adapt to changing and specific needs. Manual packaging stations remain central for efficient operations.

The ideal packing workstation is:

- Easily modifyable to new requirements and tasks
- Ergonomic to sustain the health and satisfaction of employees in the long term
- Sustainable through high quality and reliable functionality

Project partner and solution provider

Customised and ergonomic logistics workstations.

Our extensive experience and customer-oriented consultation services, combined with modern planning tools, guarantee that you receive a solution precisely tailored to your needs.

Our project managers take the time to understand your needs, desires, and processes. **Together, we find the right solution for your project.**

- Support throughout the project - from the idea to implementation
- Guidance to create the best specifications
- Innovative tailor-made solutions when modular product options are not enough - easily through our engineering and production unit in Finland
- Proposals based on joint ideation and 3D drawings

Digital logistics planning

Based on your requirements we suggest, with 3D design drawings included, proposals for ergonomic workstation solutions which optimize efficiency.

Depending on the size and requirements of the project, we also carry out on-site test setups. Furthermore, we offer our own Treston assembly service - for easy and fast implementation of your project.

Modular product and solution concept

Whether it's a standard or customised packaging solution, we have the right solution for you!

As a specialist in logistics workstations, Treston offers ergonomic, modular, and innovative packaging solutions designed to adapt flexibly to future requirements.

As a manufacturer with its own factories in Finland, we provide also tailored solutions for our customers - whether through our standardized products, which can be integrated into any work environment due to their modularity and extensive range of accessories, or through customer-specific solutions.

Fully functional packaging station

Why invest in a packing workstation?

Are you looking for a cost-effective packing workstation that is ready for immediate use and easy to set up, or a versatile solution tailored to your needs, easily adaptable to the diverse requirements of employees and processes?

Treston packing stations are complemented by a wide range of accessories for the packaging area. These include cutting devices, label and tape dispensers, packing paper roll stands, printer boards, cardboard holders, waste bins, or chairs. Additional storage options for the packaging area, such as FiFO picking racks, drawer units, cardboard carts, or drawer units, complete the range.

An ergonomic working environment for packing and unpacking, where everything has its place, reduces working time and errors, contributes to workplace safety, facilitates employee shift changes, ensures a tidy and organized workspace, and reduces stress.

A well-designed and ergonomically crafted packaging environment

- Increases efficiency and productivity of logistical processes
- Facilitates quick shift changes for employees of varying sizes
- Creates a clean and stress-free environment for employee well-being
- Contributes to safe, streamlined, and environmentally-friendly processes

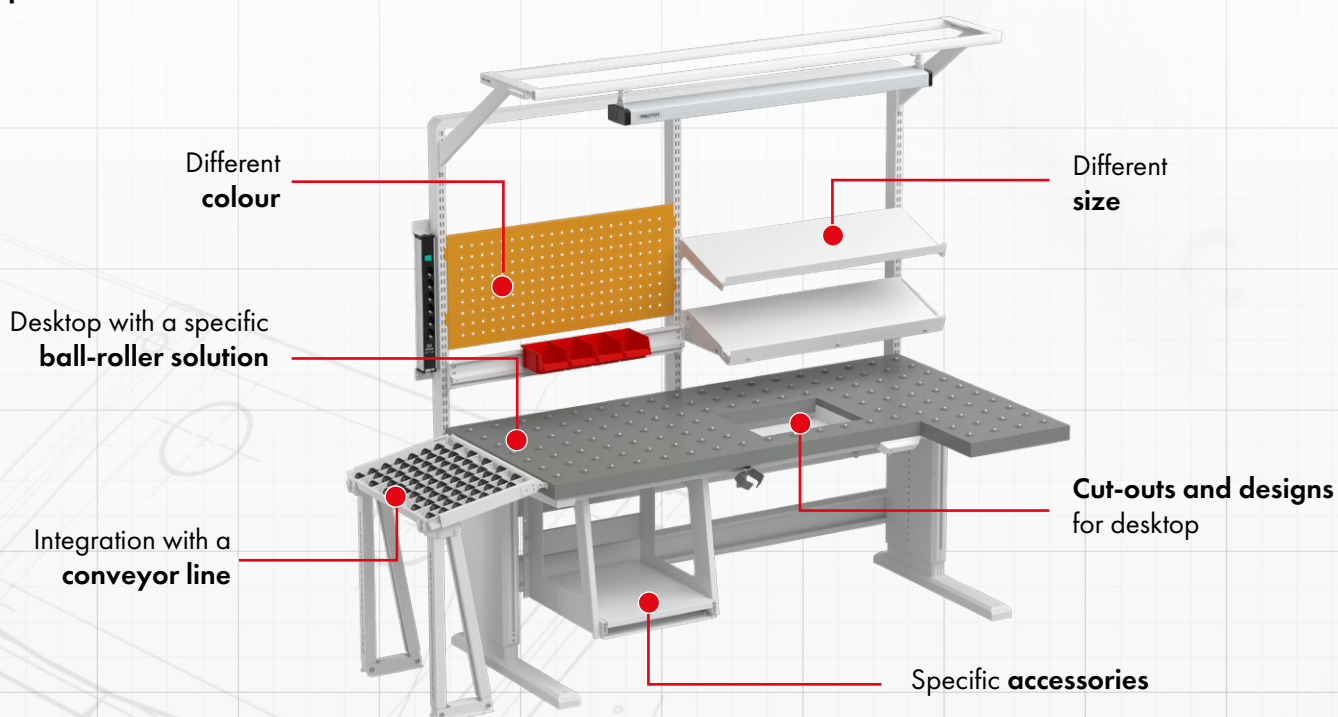

Customized special designs for optimal shipping processing

Our experts help you plan a perfect workstation for you

Tailor-made solutions for specific requirements

Our product development team collaborates closely with you and our logistics experts to develop tailor-made solutions that are precisely done according to your requirements to your wishes and requirements.

Typical modifications

One-Stop-Shop

With Treston, you will receive all the products and services needed for your project in the area of manual and semi-manual shipping processing from a single source - for a simple and efficient purchasing process.

Your advantage

- **Efficiency:** By sourcing all products and services from one place, you save time and effort.
- **Wide selection:** Treston offers you a wide range of products - from workbenches to small parts storage.
- **Cost savings:** The possibility of bundle offers or better purchasing conditions for combined purchases enables savings.
- **Consistency:** Leaning on Treston's one-stop-shop experience guarantees consistent quality and customer service experience.

Overview of Treston packing tables

Concept packing bench

- Multiple bench variations with advanced ergonomic features
- Superior range of accessories, easily reconfigured
- Excellent stability, suitable for heavy loads up to 500 kg

500 kg

TPB packing bench

- Safe, economic and ergonomic all-in-one packing bench
- Adapts and grows according to needs
- 50+ accessories and add-on products available
- Steel frame with loading capacity up to 300 kg

300 kg

TED electric desk

- TED Electric Desk comes with quick, silent and wide height adjustment
- This ergonomic sit-stand desk perfectly suits light-duty assembly work, packing applications, R&D and industrial offices
- The desk can be customized with accessories which further enhance ergonomics, free desk space and provide order
- Maximum load capacity 200 kg

200 kg

Quick Edge workstation

- The quickest height adjustment on the market - no electricity needed
- Can be customised for various operating environments
- Multiple accessories available: swivel arms for tool holders and screens, LED lights, shelves with dividers for cartons
- Maximum load capacity 100 kg

100 kg

Customised workstation solutions

Lifting platform

- Ergonomic - Adjustment of the working height to the employees working in environments connected to rigid infrastructures, such as conveyor systems or machines.
- Simple and safe - Platforms operating at a height of <500 mm are CE certified and easy to operate.
- Adaptable - The lifting platform can be expanded with various accessories such as LCD holders, shelves, etc.

Sliding ramp

- Solution for integrating workstations with conveyor technology

Workbench with height-adjustable mid section

- Boxes or other items can be brought to an ergonomic working height.
- The application was developed for packing stations in the logistics sector but can also be used in various assembly environments.

What our **customers** say about us

SPORT
conrad

The throughput time at goods receipt has been reduced from three weeks to two days.

– Thomas Janker, Head of Purchasing, Sport Conrad

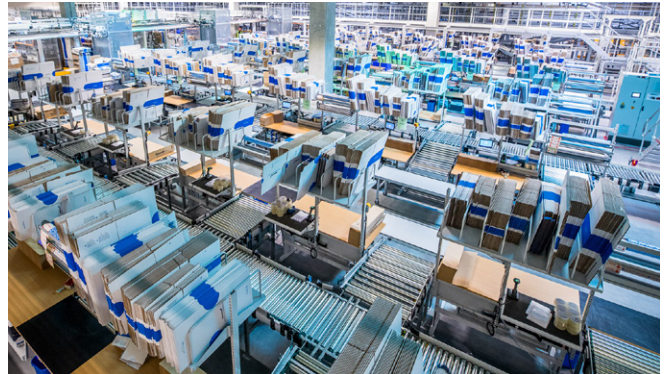

Sport Conrad has successfully optimized its warehouse processes with Treston

In collaboration with Treston, Sport Conrad has successfully implemented a logistics project while maintaining ongoing operations to achieve not only greater efficiency at all levels of the process chain but also to provide employees with an ergonomic working environment.

The precise integration of the new **TP workbenches** with the automated solutions in the warehouse noticeably accelerates workflow processes.

Thanks to the perfect design of the tables, the processing time for incoming goods was reduced from three weeks to two days.

bol.com

The two most important goals were ergonomics and efficiency. This we have reached by using the Treston solutions

– Lisanne Broer-van Abeelen, bol.com fulfilment center

The modularity of Treston products was decisive for bol.com

The vast e-commerce logistics warehouse of bol.com in the Netherlands was completely rebuilt. The goal was to make the center as efficient as possible, enabling rapid order fulfillment while ensuring good ergonomics and a pleasant working environment for employees.

Treston's workstation solutions were chosen for their modularity.

Treston **Concept workstations** are used in goods reception as well as in shipping, where three different types of packing tables are utilized.
