

IMPROVE ERGONOMICS WITH THE
TRESTON LIFTING PLATFORM

TRESTON

Treston Lifting Platform

Certified work platform for demanding industrial environments

The Treston Lifting Platform is an independently third-party certified, height-adjustable work platform designed for professional use in industrial and intralogistics environments. It enables ergonomic working conditions even where workbenches or existing infrastructure, such as conveyor systems or machinery, are not height-adjustable. This helps to reduce physical strain and sustainably support efficient workflows.

Certification in accordance with the Machinery Directive 2006/42/EC ensures maximum safety. Verified conformity provides planning confidence, facilitates integration into existing systems, and speeds up commissioning. At the same time, safety and liability risks are significantly reduced.

Each lifting platform can be individually customised to meet specific requirements and seamlessly integrated into a wide range of production and logistics environments.

Why choose Treston Lifting Platform?

- ✓ Third-party certified – compliant with Machinery Directive 2006/42/EC
- ✓ Improves ergonomics alongside fixed infrastructure
- ✓ Customisable dimensions and configurations
- ✓ Safe and easy to put into operation
- ✓ Part of Treston's complete workstation ecosystem (workbenches, seating, trolleys, lighting, storage and accessories)

Are you interested in optimized, efficient and safe in-house logistics process?

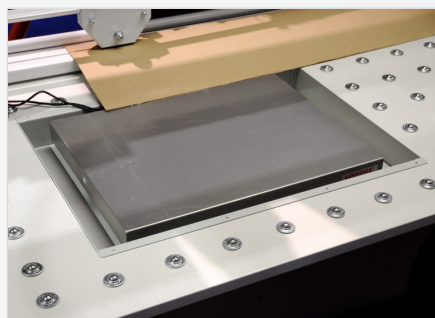

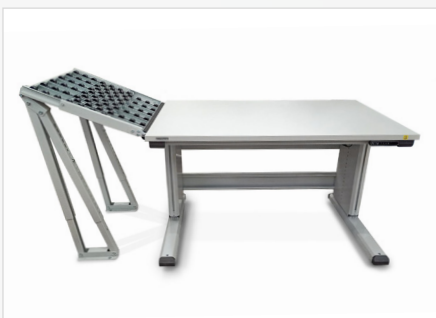

Effective logistics are paramount to companies success. Many pay attention to streamlining supply chains and how to automate warehouses. To ensure truly efficient movement of goods you need to also pay attention to workstations which need to be ergonomic and well integrated to conveyor lines supporting smooth and efficient workflow.

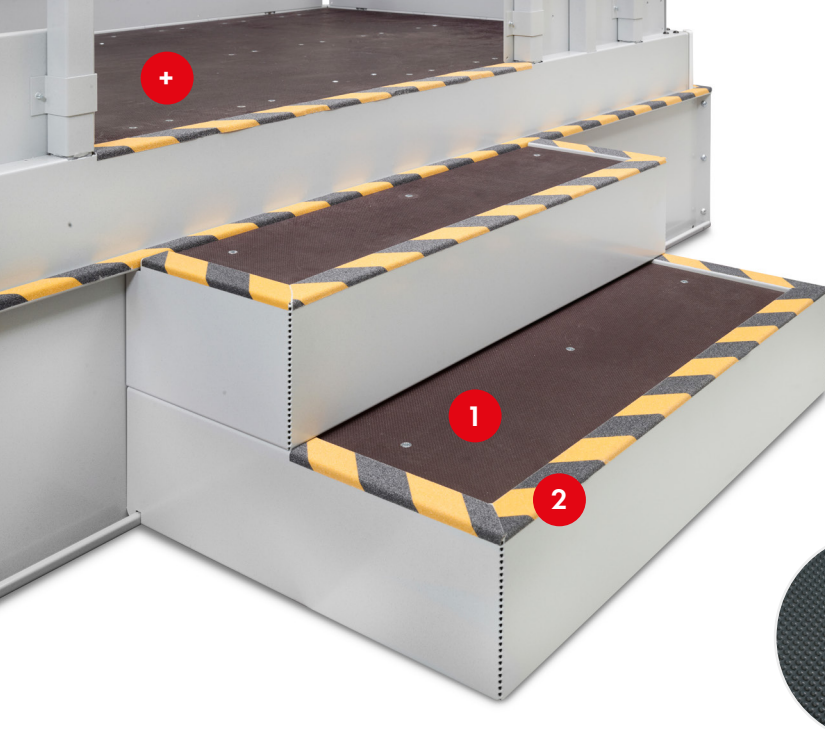

The importance of ergonomics in the industrial workplaces is becoming more important day by day. The workforce is ageing and on the other hand the younger talent values workplaces which invest in workplace health and safety.

Treston is your one-stop-provider for all workstation needs

- ✓ Well-designed ergonomic, modular and height-adjustable workbenches along with needed accessories, lighting, sit-stand chairs, trolleys and storage solutions
- ✓ Custom-made solutions made to customers specifications:
 - Solutions for integrating workstations to conveyor platforms, rigid infrastructures or collaborative robots
 - Lifting platforms

Examples of custom-made solutions for in-house logistics

Safe and easy to use

- 1 Non-slip surface that endures heavy usage
- 2 Anti-slip safety strips
- + Ergonomic mats available as accessories

Technical specifications – Treston Lifting Platform

Intended use	Height-adjustable work platform for professional use in industrial environments, such as assembly, packaging and light-duty applications.
Rated load	400 kg evenly distributed 1 person during adjustment, up to 2 persons when stationary
Lifting height	150–499 mm
Dimensions (W x L)	800–2000 mm x 800–5000 mm (symmetrical rectangular shape)
Operating temperature	0 °C to +40 °C
Power supply	230 V / 50 Hz or 115 V / 60 Hz
Control	Hand control or foot panel
Gate	Optional
Certification	Product Conformity Certificate issued by an independent inspection body in accordance with the Machinery Directive 2006/42/EC.

Options for height adjustment

1. Hand panel with memory function and LED display
2. Foot pedal

CE-marked plug-and-play solution
